5.0 Land Classification (Open Space)

No.	Feature Class	Data Class	Feature Name	Data Type	Definition	Acquisition criterion	Data Acquisition method	Symbol (Shape and Size)
	Land Classification (Open Space)	Facility Space	Park	polygon	A large open space with grass and trees, especially in a city, where people can walk, play games etc.	The park more than 100m by 100m should be plotted.	The data will be acquired by the photo interpretation/field verification. The boundary of park shall be plotted.	Colour : Green 
	Land Classification (Open Space)	Facility Space	Play Ground 運動場	polygon	A piece of ground for children to play on, especially at school or in a park.	The play ground more than 100m by 100m should be plotted.	The data will be acquired by the photo interpretation. The boundary of play ground shall be plotted.	Colour : Green 
	Land Classification (Open Space)	Facility Space	Homesteads/ Garden 敷地・庭	polygon	The part of a piece of land around or next to your house that has flowers and plants in it.	The homesteads/garden more than 50m by 50m should be plotted.	The data will be acquired by the photo interpretation. The boundary of homesteads/garden shall be plotted.	Colour : Green 
	Land Classification (Open Space)	Farm	Aquatic Farm (Fish Farm) 養魚場	polygon	A place where fish are bred as a business.	The aquatic farm more than 100m by 100m should be plotted.	The data will be acquired photo interpretation/field verification. The boundary of aquatic farm shall be plotted.	Colour : Blue 
	Land Classification (Open Space)	Farm	Agricultural Farm 農園	polygon	A place where agricultural produces are produced as a business.	The agricultural farm more than 100m by 100m should be plotted.	The data will be acquired by the photo interpretation/field verification. The boundary of agricultural farm shall be plotted.	Colour : Pink 
	Land Classification (Open Space)	Farm	Livestock Farm 牧畜場	polygon	A place where the animals are kept as a business.	The livestock more than 100m by 100m should be plotted.	The data will be acquired by the photo interpretation/field verification. The boundary of livestock farm shall be plotted.	Colour : Pink 

	Land Classification (Open Space)	Religious Space	Cemetery 墓地、各宗教の墓地	polygon	An area of land where dead people are buried.	The cemetery more than 50m by 50m should be plotted.	The data will be acquired by photo interpretation/field verification. The boundary of cemetery shall be plotted.	Colour : Blue (Pattern) 
	Land Classification (Open Space)	Park Space	Car Park 1	polygon	An enclosed area in a public place for cars to be parked in.	The car park 1 more than 100m by 100m should be plotted.	The data will be acquired by the photo interpretation/field verification. The boundary of car park area 1 shall be plotted.	Colour : Black 
	Land Classification (Open Space)	Park Space	Car Park 2	point	An enclosed building in a public place for cars to be parked in.	The car park 2 building has more than 3 stories.	The data will be acquired by the field verification. The centre of park building shall be plotted.	Colour : White (Black 10% for specification and legend)
